

Improvisational Creativity Workshop 2017

Performance Proposal

As part of the workshop we will have a live performance evening on Thursday, 20th July, from 5.30 - 7.30pm. This will take place on the outdoor terrace that is part of the Monash Prato Centre. The technical setup for performances will consist of a stereo PA with mixing desk and foldback speakers. We are also able to provide single channel video projection. We are not able to provide any further technical equipment to support the performance of your work, so you will need to work within these constraints. As the focus of the workshop is on improvisation we ask you to make clear how your performance addresses human-machine improvisation in your submission. Due to the number of proposed performances we ask that you limit your performance to a *maximum* of 10 minutes' duration.
